ITO KEI(54) ATTACHING STRUCTURE FOR WALL  
SURFACE PANEL PLATE

## (57) Abstract:

**PURPOSE:** To prevent the occurrence of a gap between the upper and lower ends of a wall surface panel and fixing members or the damage of the upper and lower ends of the wall surface panel even in the case where a part having defective accuracy occurs at the upper and lower ends of the wall surface panel, or the said panel warps, or the wall surface of a building deforms.

**CONSTITUTION:** The rising up part 16 of a lower fixing member B2 is inserted in the lower side recess groove 32 of the wall surface panel A. A lower side inner protruding part 34 is mounted on the horizontal part 14 of the lower fixing member B2. A lower side elastic sealing material 50 abuts on the hanging down part 18 of the lower fixing member B2 from its outside. The hanging down part 18 of an upper fixing member B1 is inserted in an upper side recess groove 26. An upper side inner protruding part 30 abuts on the vertical face 12a of the bending part 12 of the upper fixing member B1 from its outside. The upper side elastic sealing

material 46 abuts on the hanging down part 18 of the upper fixing member B1 from its inside.
